

Bio

Onésimo Hernández–Lerma Obtained the “licenciatura” degree from the National Polytechnic Institute (IPN) in Mexico City, and the M.Sc. and Ph.D. degrees from Brown University, Providence, R.I., USA. Since 1978 he has been with the Mathematics Department of CINVESTAV (Center for Research and Advanced Studies), IPN. His research interests include stochastic control, dynamic games, Markov processes, and infinite-dimensional linear programming. In these areas and related subjects, he has published over 100 research papers in international journals and 10 books, the last one, *Continuous–Time Markov Decision Processes* (Springer), will appear this year. He has supervised 15 Ph.D. theses. Among other honors, he received the *Sciences National Award* from the Government of Mexico (2001), a doctorate *honoris causa* by the University of Sonora (2003), the *Lazaro Cardenas Medal* from the IPN (2008), and the *Scopus Prize* by Elsevier (2008).
